

JOHN KERRY on the ENVIRONMENT' (part two)

“Our economy and our society cannot permanently be held hostage to foreign oil in the hands of potentially hostile powers. It is time . . . for a declaration of energy independence.”

Senator John Kerry has and will:

- Encourage Renewable Energy (20% from wind, solar, geothermal, ethanol, and biomass)
- Conserve Energy and Cut Pollution (with efficient vehicles which are more efficient, safer, save millions of barrels of oil daily, reduce greenhouse gases, and save money)
- Clean Up Toxic Waste (cosponsor of legislation that would have brought millions more dollars to communities to clean up Superfund toxic waste sites)
- Enforce Environmental Laws (justice for communities that have been victims of corporate environmental assaults)
- Protect Clean Environment in Trade Agreements (negotiate agreements that grow economy and create jobs but don't allow for avoiding our nation's environmental standards)
- Curb Global Warming and Ozone Depletion

John Kerry was named an Environmental Hero
by the League of Conservation Voters
